Subject: RE: Saint-Gobain Pevely MO request for approval of  
alternative control technology

History: This message has been forwarded.

Good morning, Katie,

On return from the holiday, I thought I'd check back in with you on this pending request from SGCI for approval to use the candle technology. When we spoke earlier this month, you indicated you had sent your recommendation up the chain and expected a final decision shortly. They need to make a decision on bids, so it is becoming very critical that they get an official response this week.

Thanks for your help.  
Bliss

I don't have any questions. We are proceeding with our review and hope to have it finished soon.

Katie

Good afternoon, Katie,

I'm just following up to confirm you received the email and attachment I sent via BlackBerry last week and to see if you had any questions or needed any additional information at this point.

Thanks again for your help,  
 Bliss

 alternative  
 control technology

Katie,  
 Thank you for speaking with me today. Attached is the request for approval of an alternate control technology to meet the PM and SO2 requirements under the GCD for Pevely Furnace 20 and 21. As I noted, SGCI needs to order equipment soon (no later than November) to assure compliance, so it is important for them to know if this technology is an option, I look forward to hearing from you next week.

Bliss

alternative  
control technology

Hello, Lisa,

I am emailing in follow up to my voice message regarding the  
above  
referenced request, dated July 26, 2011, attached.  
You can reach me at the email address and phone numbers below.

If you have any questions or need any further information in  
conducting  
your review, please don't hesitate to contact me. Also, if you  
could  
provide any information regarding the likely timing of an EPA  
decision  
on this request, that would be greatly appreciated.

Thank you for your time,  
Bliss
